Update to the cervical cancer screening (NCSP) guidelines – 1 February 2021

This is a notification to you or your organisation of an update to the [National Cervical Screening Program: Guidelines for the management of screen-detected abnormalities, screening in specific populations and investigation of abnormal vaginal bleeding](#).

Two parts of Section 6 *Management of oncogenic HPV test results* have been reviewed and updated, updated guidance is now live:

- [HPV oncogenic types not 16/18](#)
- [Self-collected vaginal samples](#)

-
See also:

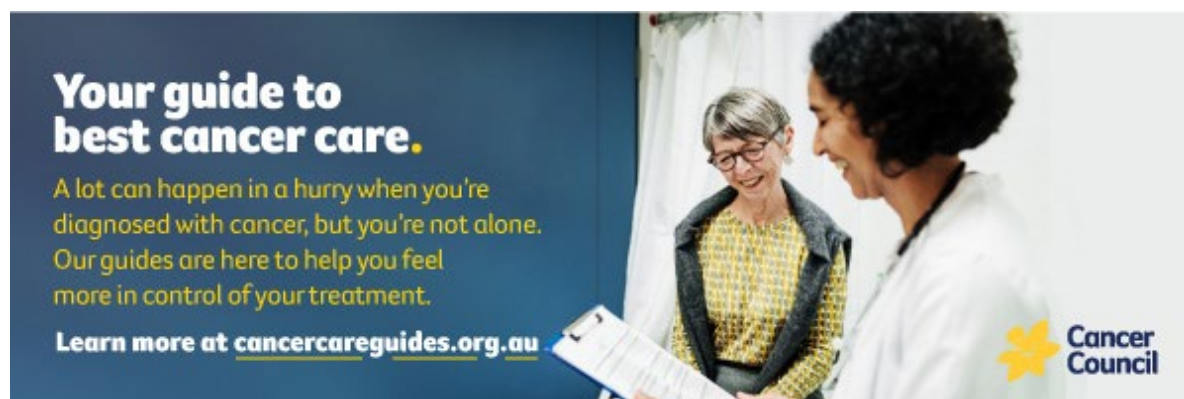

- [Information about the partial update](#)

If you are receiving this as the main point of contact for an organisation or association, please do share with any members or colleagues that may be interested.

Kind regards,
Cancer Council Australia

P.S. If you have received this notification via an organisation and would like to be notified personally of further updates to this guideline, please email your request to guidelines@cancer.org.au.
